

Key	Summary	Story Type	Acceptance Criteria						
EVOKE-1	CNO can log in a Feature		Given I have CNO credentials, when I access the portal, then I can successfully log in and navigate to the Subscription Management module.						
EVOKE-2	System filters Org Validation		The organization selection field must only display and allow selection of CSO-type organizations (excludes infrastructure owners).						
EVOKE-3	Location selection Functional		Locations displayed must dynamically update and be filtered based on the selected CSO organization.						
EVOKE-4	CNO can select s Functional		CNO can select multiple chargers associated with the chosen location.						
EVOKE-5	System prevents Validation		When viewing available chargers, Decommissioned or Uncommissioned chargers must not be selectable (BR-02).						
EVOKE-6	System blocks su Validation		If a charger is linked to an Active or Pending subscription, an error is displayed, and submission is blocked (BR-01).						
EVOKE-7	System validates Validation		If the total selected connectors (ports) exceed the allowed limit, the system must block submission and display an error.						
EVOKE-8	CNO can set the Functional		The term field must accept input, representing the duration in years (typically annual).						
EVOKE-9	Subscription Type Functional		The default value for the Type field is 'Renewal' (BR-05).						
EVOKE-10	CNO can manual Functional		The 'Total Ports' field must allow manual numerical entry, representing simultaneous charging capability.						
EVOKE-11	Amount field is a Functional		The 'Amount' field must automatically calculate based on term, type, and port count, and the field must be disabled for user editing (BR-04).						
EVOKE-12	Submission requ Validation		If the CSO is missing a Reseller or the Reseller lacks a valid billing contact, submission must be blocked (BR-03).						
EVOKE-13	System auto-gen Automation		Upon successful submission, an invoice is automatically created.						
EVOKE-14	Auto-generated i Automation		An email containing the invoice is automatically dispatched to the CSR's registered email address.						
EVOKE-15	Subscription Stat Functional		The subscription status is set to 'Pending' immediately after creation and remains so until payment is received.						
EVOKE-16	Status updates a Automation		Upon receipt of payment, the subscription status field automatically changes to 'Paid'.						
EVOKE-17	System sends a Automation		An automated confirmation email is sent once the status updates to 'Paid'.						
EVOKE-18	Authorized CNO Functional		Only an authorized user (CNO) can perform the manual activation action.						
EVOKE-19	Term Start/End d Functional		When activation is performed, the 'Term Start' and 'Term End' dates are populated and displayed on the dashboard/grid.						
EVOKE-20	System logs ever Non-Functional		Every action—creation, update, activation—must be logged for traceability and compliance (Auditability).						
EVOKE-21	Sensitive data is Non-Functional		All organizational, payment, and contact data must be securely handled (encrypted transmission and storage).						
EVOKE-22	Invoice generatio Non-Functional		Invoice generation and payment updates should reflect in real time on the dashboard (Performance).						
EVOKE-23	Module maintains Non-Functional		The module should maintain high uptime and reliable accessibility across user roles (Availability).						
EVOKE-24	System handles s Non-Functional		System must handle multiple CNOs, CSOs, and concurrent subscriptions seamlessly (Scalability).						
EVOKE-25	Future: Auto-rene Enhancement		I can configure a subscription for an auto-renewal mechanism for recurring CSO subscriptions.						
EVOKE-26	Future: Dashboa Enhancement		The dashboard must display metrics for subscription trends and revenue insights.
