

Business Requirements Document (BRD)

Project: Zuri AI Dashboard
Document Version: 1.1
Date: October 16, 2025

1. Overview

Zuri AI Dashboard is an intelligent workspace designed to empower sales and management users with AI-driven insights, productivity tools, and data visualization capabilities. The system integrates Google OAuth authentication, AI-powered dashboards, Kanban-based deal management, contact CRM, and exportable performance reports.

2. Objectives

- Simplify user access and ensure secure authentication.
- Provide a unified AI-enabled workspace for sales and management teams.
- Enable intuitive deal and contact management.
- Deliver actionable insights through reporting and forecasting.
- Support data-driven decision-making with export-ready summaries.

3. Key Functional Requirements

ID	Feature	Summary
ZB-1	Google OAuth 2.0 Authentication	Secure login via Google, token validation, and session management.
ZB-2	Personalized Dashboard with AI Chat	Custom widgets, AI chat for insights, export options.
ZB-3	Contact Management	CRUD operations, bulk import, filtering, and activity logs.
ZB-4	Kanban Deal Management	Visual pipeline, drag-drop, stage-based forecast and tracking.
ZB-5	Report Generation & Export	Deal Forecast, Activity Log, Adoption reports with export and scheduling.

4. Non-Functional Requirements

Category	Description
Security	OAuth 2.0 compliant; HTTPS/TLS encryption; secure data storage.
Performance	Dashboard loads within 3 seconds; Kanban updates under 1 second.
Scalability	Support 1,000 concurrent users.
Usability	Intuitive drag-and-drop, clean UI with consistent theme.
Compliance	Full GDPR compliance with user consent management, data minimization, right-to-erasure, and audit logging.

5. Regulatory Compliance – GDPR Data Handling

- User data will be processed lawfully, fairly, and transparently under GDPR Article 5.
- Consent will be explicitly obtained for all personal data collection and stored with timestamps.
- Data minimization principles will be applied — only essential fields are retained.
- Users will have access to their data and the right to request deletion (Right-to-Erasure).
- All processing activities will be logged for auditability and compliance verification.
- Encryption (at rest and in transit) will be enforced for all sensitive user data.
- Data retention policies will comply with both business and legal requirements.

6. Approval

Name	Role	Signature	Date
Geetashish Sharma	Product Owner		
Karthick S	Project Manager		
Amzur ATG	Author
