

Business Requirements Document (BRD)

Project: Zuri AI Dashboard
Document Version: 1.3
Date: October 16, 2025

1. Overview

Zuri AI Dashboard is an intelligent workspace designed to empower sales and management users with AI-driven insights, productivity tools, and data visualization capabilities. The system integrates Google OAuth authentication, AI-powered dashboards, Kanban-based deal management, contact CRM (with activity tracking), and exportable performance reports.

2. Objectives

- Simplify user access with secure Google OAuth 2.0 authentication.
- Provide a unified AI-enabled workspace for sales and management teams.
- Enable efficient deal and contact management with activity tracking.
- Deliver actionable insights through reports, forecasts, and scheduling.
- Ensure GDPR-compliant handling of all user and organizational data.

3. Functional Requirements by User Story

ID	Feature	Summary
ZB-1	Google OAuth 2.0 Authentication	Secure login, token validation, refresh handling, and audit logging.
ZB-2	Personalized Dashboard with AI Chat	Widgets, AI assistant, export options, and responsive UI.
ZB-3	Contact Management	CRUD, bulk import, filters, grouping, activity logs, and AI enrichment.
ZB-4	Kanban Deal Management	Visual pipeline, drag-drop, forecast charts, and deal history.
ZB-5	Report Generation & Export	Deal Forecast, Activity Log, and Adoption Metrics Reports with scheduling.

ZB-5: Report Generation & Export

- Generate and export reports: Deal Forecast, Activity Log, and Adoption Metrics.
- Apply filters for user, team, date range, and activity type.
- Support export formats: CSV, XLSX, and PDF.
- Enable report scheduling (weekly/monthly) with email delivery to managers.
- Provide visual dashboards with KPIs and export history tracking.

Report Types

Deal Forecast Report

- Displays total forecasted revenue by stage, owner, and time period (weekly, monthly, quarterly).
- Shows metrics such as total deals, conversion rate, expected value (EV), and variance from target.
- Allows filtering by owner, team, date, and probability range.
- Provides bar/line charts for pipeline trends.
- Supports export to CSV, XLSX, and PDF.

Activity Log Report

- Captures user-level actions such as logins, contact updates, deal movements, and AI chat usage.
- Includes filters for activity type, user, and date range.
- Displays activity timelines and frequency charts.
- Supports export and scheduled delivery.
- Integrates with GDPR audit trail for traceability.

Adoption Metrics Report

- Tracks adoption of Zuri features like AI chat, Kanban use, and report generation.
- Shows feature engagement percentage and growth trends.
- Compares adoption across users, teams, or departments.
- Includes pie/bar visualizations for engagement ratios.
- Supports export, scheduling, and integration into dashboard KPIs.

4. Non-Functional Requirements

Category	Description
Security	OAuth 2.0 compliant; HTTPS/TLS encryption; secure data storage.
Performance	Dashboard loads within 3 seconds; Kanban updates under 1 second.
Scalability	Supports 1,000+ concurrent users without degradation.
Usability	Intuitive drag-and-drop UI with consistent design theme.
Compliance	Full GDPR compliance with consent management, data minimization, right-to-erasure, and audit logging.

5. GDPR Compliance Features

- Consent Management: Explicit consent obtained before processing any personal data.
- Data Minimization: Only essential data is collected and retained.
- Right-to-Erasure: Users can request deletion of their data anytime.
- Audit Logging: All user interactions, consents, and CRUD actions are logged.
- Encryption: All sensitive data encrypted at rest and in transit.
- Transparency: Users can view stored data and export their profile history.

6. Approval

Name	Role	Signature	Date
Geetashish Sharma	Product Owner		
Karthick S	Project Manager		
Amzur ATG	Author
